# Welcome

Dear Guests,

With the pleasure of all members of the **ophthalmology department Kasr AlAiny Faculty of medicine** we welcome all of our ophthalmologists colleagues joining us in our annual meeting. Our theme this year is all about complications, where we share the experiences of our faculty members covering complications on all subspeciality fields. We will also enjoy the brilliant case presentations of our junior staff.

This year we lost one of our great professors and teachers **Prof. Gihad AlNahry** who we are going to dearly remember in the meeting.

Our keynote lecture will be under the name of **Prof. Mohamed Ayoub** who has huge impact in the development of modern cataract surgery and phacoemulsification in Egypt and a great teacher for so many ophthalmologists' generations. We will be connecting with our member staff abroad in a 45 minutes session to tell us about what are they doing differently this year.

The second day of the meeting is dedicated to courses in various attractive subjects.

The main tradition of our ophthalmology department is transfer of knowledge and expertise between all generations with Care, love and respect. So, looking Forward to a great meeting and a lot of useful discussions, we welcome you again.

Head of Ophthalmology Department

**PROF. YEHIA SALAH**
